Good day po ako po yung nag post about dun sa app developer or website.. ask ko lang po kung mag kano ang pagawa po sa inyo?

hi po! actually nagdedevelop na po ako ng projects for personal and hackathons and tbh is di me familiar sa rating e

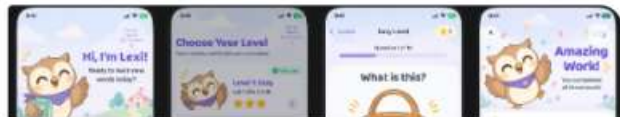

also i am also a student so budget lang din

depends po sa project scope and complexity po

may project details na po ba kayo ma'am? 😊

1st time lang din po lase namin mag pagawa para sa thesis.. ang gusto po namin ay educational application

okay po feasible po sya

question lang po, ano pong course nyo? also may progress or prototype na po ba kau ?

Reynalyn replied to herself

Bale parang ganto po yung design na gusto namin

kasi if ever po meron na po kayo existing project is willing po ako magcontribute until matapos

aaaaa

besides po me, may other pa po ba kau kausap regarding this po ?

we g naman po

ganto na lang miss, we need to know all the important details such as kelan ang deadline, mga timeline ganon at ano ang deliverables

Reynalyn replied to you

besides po me, may other pa po ba kau kausap regarding this po ?

Ikaw palang po ang nakaka usap namin from the page. Meron pong na recommend sa amin na developer rin and nasubukan napo nila yun kaso ang problema po kase namin ang taas ng ratings po nya aabutin ng 10k eh di po namin kaya. So nag hanap po kami ng other option.

Aa

Reynalyn Lipa Bunag

namin ang taas ng ratings po nya aabutin ng 10k ehh di po namin kaya. So nag hanap po kami ng other option.

also to inform u maam, 2 devs po kami na magdedevelop po sa app project nyo po which means na hindi naman po double ang ratings namin

i am currently discussing po with my dev teammate

dont worry maam di po kami barat

di ko po gets. bali po ba is nakadepende po yung requirement nyo sa magiging pricing po namin ?

like wala po ba kayo specific requirement if app or web po ?

tama po ba miss ?

sorry miss if marami po tanong

Reynalyn replied to you

like wala po ba kayo specific requirement if app or web po ?

Yes sir. Kase ang alam namin mahal ang ratings sa application maslalo na kapag offline po

Aa

Reynalyn Lipa Bunag

like wata po ba kayo specific requirement if app or web po ?

Yes sir. Kase ang alam namin mahal ang ratings sa application maslalo na kapag offline po

Reynalyn replied to you

sorry miss if marami po tanong

Okay lang po

Pero tbh po mas gusto sana namin na maging product po ng thesis namin ay educational application po na offline

Sir about po doon sa magiging structure ng app po sana po ay meron po doong option na "LEARN" and "PLAY". Don sa learn po ay parang flashcard type lang po sya na matuto ang bata. Then sa play don napo papasok yung tatlong level po easy average difficult po.

Hello miss, napag-usapan na po namin ng teammate ko and na-review po namin nang maayos yung features and functions na nasa DOCX na sinend ninyo.

For the mobile application**, based po sa scope ng project, yung usual estimated development cost po talaga niya would be around ***P10,000–P12,000***, especially since offline application po siya and around ***18 screens*** yung indicated sa requirements.

Kasama po kasi sa development yung different learning levels and features such as:

- Easy, Average, and Difficult learning levels
- Flashcard-based activities
- Sentence-based activities
- Story/reading comprehension activities
- Question and answer logic
- Scoring and results
- Level unlocking/progression
- Vocabulary Review

Aa

- Question and answer logic
- Scoring and results
- Level unlocking/progression
- Vocabulary Review
- My Progress / progress monitoring
- Stars and badges/achievements
- Retry and review functions
- Offline/local data storage
- Navigation between the different screens and activities
- Audio/pronunciation support where applicable

Considering din po na around ***1 month yung development scope***, kailangan po talaga namin i-allocate yung time for development, testing, debugging, and revisions.

Pero since naiintindihan po namin na student/research project po ito and gusto rin po naming makatulong sa thesis ninyo, ***P8,000 po yung student-friendly price na kaya naming i-offer for the app development***.

For the ***web application***, mas affordable po siya compared sa offline mobile app. Since web-based po siya, pwede rin siyang ma-access through both ***mobile phones and PCs/laptops***, although hindi po siya intended to work fully offline.

For the web version, yung estimated cost po sana would be around ***P7,000–P9,000***, pero for your group, ***P6,000 po yung kaya naming i-offer***.

So basically po:

- *Offline Mobile App — P8,000***
- *Web Application — P6,000***

Yung main difference po is yung platform and offline capability. Sa mobile app, specifically po natin siyang ide-develop as an offline educational application na pwedeng gamitin directly sa phone. Sa web version naman, mas flexible siya in terms of device compatibility dahil pwede sa phone, tablet, or PC/laptop, pero kailangan po

Sa web version naman, mas flexible siya in terms of device compatibility dahil pwede sa phone, tablet, or PC/laptop, pero kailangan po ng browser and generally internet connection.

May additional option din po kami:** if gusto ninyo na magkaroon ng ***both mobile app + web version, instead of $\text{P}8,000 + \text{P}6,000 = \text{P}14,000$, pwede po namin kayong bigyan ng ***P10,000 package price*** for both.

We can also discuss po kung may features na kailangan i-prioritize or bawasan depending sa budget, para masigurado namin na achievable yung development within the agreed timeline.

For the educational content po, kailangan din po namin na ma-provide/ma-finalize ninyo yung approved vocabulary words, sentences, stories/passages, questions, images/audio, and other research materials na gagamitin sa app, since based po sa document, dapat aligned yung content sa approved Grade 3 ARAL materials.

Once finalized po yung scope and content, saka po namin ma-establish nang mas clearly yung timeline and deliverables para transparent po sa both sides.

We can also discuss po kung may features na kailangan i-prioritize or bawasan depending sa budget, para masigurado namin na achievable yung development within the agreed timeline.

Like if may certain budget po kayo maam is kayang kaya naman po iacomodate po

Sa given scope project detail nyo lang po kami nagbased ng pricing pero if ever po na may di naman po need implement or makita sa project nyo po then babawasan naman po ang pricing

gets po ba maam ?

8k po for app and 6k po for web miss

Reynalyn Lipa Bunag

gets po ba maam ?

8k po for app and 6k po for web miss

baka po di nyo nabasa lahat po

yung pricing po kasi sa market po nyan is around 10-12k po pag app dev e

Sige sir naiintindihan ko naman po qt nabasa lahat. Ih didiscuss ko lang sa mga groupmates ko and pag uusapan po namin

You replied to Reynalyn

Sige sir naiintindihan ko naman po qt nabasa lahat. Ih didiscuss ko lang...

Yes po maam, also maam reminder ko po na hindi po fixed price yan

like if magrerevise po kayo ng project detail nyo po and some features are nabawasan po, which means syempre po mababawsan din po ang costing

Hindi naman napo siguro sya tataas po noh?

hindi po maam hahahahaha unless may new feature po kayo na ipapalagay. Pero kapag naman po kunwari is may issues or bugs sa app po is no fee po yon kasi responsibility po ng dev yon

kunwari rin po is may target costing lang po kayo, kaya din po namin mag adjust po

Sir baka daw kaya ng 7k? Hehehe

sure maam

pero expecting nyan maam is some features is ireremove po ?

wait maam kausapin ko po teammate n
